SDOH Spectrum of Impact

1

Point of Care:
Provide immediate relief for pressing social needs through either direct services or referral.

2

Actively Managed:
Augment the care for those already receiving support to address their social as well as medical needs.

3

In Need But Not in Care Management:
Identify needs through screening, predictive modeling, or community analysis to support people who have barriers to interacting with the healthcare system.

4

At-Risk / Pre-Crisis:
Intervene upstream, before greater healthcare needs emerge. Identify individuals at risk for health issues by using social data, partner referrals and other forms of forecasting.

5

Community-Level Prevention:
Provide support and prevention by addressing social needs at the community level.
